GENERAL CONTRACTOR

Mission Construction, LP.

CLIENT

New Process Steel

LOCATION

Houston, Texas

PHOTOGRAPHY

Slyworks Photography

COMPLETION

2013

OBJECTIVE

To increase natural light quality inside the office space.

BACKGROUND

New Process Steel is a carbon steel processing and manufacturing company. They transitioned their office to an existing metal warehouse that was on their current site location.

SOLUTION

Implementation of Shoji pattern wall system. False panels were installed in the front and the translucent panels on the side where the light would distribute into the office space.

RESULT

The translucent panel Kalwall system allowed natural light to diffuse into the office area. Natural daylight has been studied and proved to increase employee attitude and work production.
